Dental Shakti System (LightWorker™ Series)

Richard Eisenberg has made a series of attunements, shakti and systems inspired by the systems from Dr. Jason Storm – another teacher who has graciously given his permission to have his systems and manuals here in the LightWorker System.

You can find Richard's systems for sale some places, but he has always wanted to give them freely, which we do here. They are all free of cost! **Do not pay for free systems!**

Dental Shakti System

This system is designed to help maintain good dental health. It is composed of three attunements. The first attunement is called "Dental Shakti" and it is for general cleaning and strengthening. The second attunement is called "Deep Dental Shakti" it goes deeper into the less physical origins of dental issues. And the third is "Comfortably Numb" is used only for pain. Reading the descriptions of the energies in each attunement will let you know just what each attunement does.

This attunement does not take the place of brushing, flossing or any other physical means of dental care. Please brush and floss carefully twice a day. And see a dentist once or twice a year for a check-up.

1 - Dental Shakti

The energies in this shakti will be adjusted by the dental angels working with your higher self. They will only activate the energies that you need and they will figure out the right combination and strength and length of activation time of the energies each time you activate the shakti. This attunement is composed of the following energies.

Cleaning field

This is an energetic field that permeates the teeth and surrounds them. It inhibits the growth of infections, bacteria, fungus, mold, virus, parasites, plaque and tarter, calcification, mineralization and ossification. It can reach areas that brushing and flossing can not reach. The energy(s) that forms and sustains, infections, bacteria, fungus, mold, virus, parasites, plaque and tarter, calcification, mineralization and ossification are cleared out of all physical and energetic systems (meridians, chakras, subtle bodies, the aura, ao centers and all other energy fields, flows, centers and accumulations.). Energies that inhibit and heal infections and the overgrowth of bacteria, fungus, mold, virus, parasites, plaque and tarter, calcification, infections, mineralization and ossification are brought in or activated.

A second energy is included in the clearing field that removes the sustaining energy of any pre-existing, infection, bacteria, fungus, mold, virus, parasites, plaque, tarter, calcification, mineralization and ossification making it so brittle that it disintegrates into a fine powder and falls off the teeth. All dead bacteria, fungus, mold, virus, parasites, plaque, tarter, calcification, mineralization and ossification etc. is swept up by saliva and the circulatory and lymphatic system and carried away for processing and elimination.

Anti-cavity/gingivitis Shakti

This energy neutralizes the energies that create and maintain physical substances that form the acids, bacteria or other substances that contribute to cavity and gingivitis formation. Once their energy is neutralized the physical substances become inert and fall apart into a fine powder. Only the acids and bacteria etc. that form cavities and gingivitis will be neutralized. Acids and bacteria needed for the proper digestion of food and normal dental and digestive health will remain as long as they are needed.

Anti-putrefaction field

This energy inhibits food and other substances in the mouth from putrefying and contributing to cavities, gum, bone disease and nerve damage.

Structural Integrity field

This energy strengthens the structure of the teeth, gums, bones and nerves. It acts to reinforce the healthy energetic “blueprint” of these structures thus strengthening the physical structures.

Revitalization Energy

This energy is a basic re-vitalizing energy. It works on all energetic levels to re-energize the entire oral cavity. When used consistently over time it brings a new vitality to the mouth, teeth, gum, bones and nerves.

Restoration Shakti

This is the energy of building and making new. It helps to rebuild worn out, deteriorated parts of the mouth, including teeth, gum, bone and nerves.

2 - Deep Dental Shakti

The energies in this shakti will be adjusted by the dental angels working with your higher self. They will only activate the energies that you need and they will figure out the right combination and strength and length of activation time of the energies each time you activate the shakti. This attunement is composed of the following energies.

Detoxification Shakti

This energy rids the body of un-needed and unhealthy amounts of fluoride in all of its forms. It allows the appropriate amount of fluoride needed for strong healthy teeth to stay on or in the teeth. The rest of the fluoride is broken down into the atoms that compose it and it is eliminated. This shakti does the same for all other unhealthy chemical, minerals and drugs related to dental health.

Thought Worm Dental Attunement

This energy acts like a worm that crawls through your thoughts and feelings and seeks out the ones that contribute to poor dental health. It also finds all thought forms and emotional forms that contribute to poor dental health. Once it finds them it will completely flush their energy out of all physical and energetic systems (meridians, chakras, subtle bodies, the aura, a.o. centers and all other energy fields, flows, centers and accumulations.). These thoughts-feelings/energies will be transformed by the higher self into light. Any energy system that needs unblocking or repair to achieve this will be unblocked or fixed so that so that the goals of this attunement can be achieved.

Entity Removal Shakti

The dental angels (see dental angel attunement) will seek out any entities related to any dental issue. They will respectfully discover the root needs of the entity and find a better, healthier, way to fulfill the needs of the entity so it/they can leave you or at least cause you no harm. If the entity is only responding to the needs of the person the angels will find a better, healthier way to satisfy the needs of the person so they no longer require the entity or the dental problem.

Oral Karma

This shakti is connected to the higher self. This energy asks the higher self to work at eliminating any karmic events that negatively affect the mouth, teeth, gum, bone and nerves.

DNA, Race, Family Shakti

This energy works to alter your DNA in such a way as to help you overcome any genetic causes of any dental issue. It will also work to undo racial or family causes of any dental issue.

Dental Angels

This aspect of the system calls in your personal angels that work in general with your overall health and more specifically with your dental health. The angels will oversee the functioning of both attunements and help with your overall dental wellness. They will do individual work on you for your dental health.

3 - Comfortably Numb Healing Shakti

This energy helps to deaden pain and heal the cause of the pain.

Use of the attunements

Activate by saying or thinking, "Dental Shakti" or "Deep Dental Shakti" with the intension of activating the energies. Your intension is more important than the words you use. For example if you forget the name of one of the shakties but intend for it to activate it will. You can use either one any time you want. My recommendation is to use Dental Cleaning Shakti every time you brush and floss or in-between meals when you know that you will not be able to brush for a while. It will be active for about 20 minutes. Deep Dental Shakti can be used several times a week as you feel the need. For the first several months after receiving the attunement to Deep Dental Shakti you may feel like activating the energy fairly often. This should wane as after a while. Deep Dental Shakti will be active for about 20 to 30 minutes.

You can also activate one or any number of the energies in either one of the attunements by themselves. In this case you would name the attunement and then name which energy you wish to activate. The other energies will be dormant. For example let's say that you only want to activate Detoxification Shakti in the Deep Dental Shakti you would say or think, "Deep Dental Shakti Detoxification Shakti"

This system has been empowered so that reading the following paragraph with the intension of self attuning into this system will in fact attune you to the system. You may read through it without the intension of attuning to the system first to make sure you really want to do it.

Each attunement must be asked for separately. However you only need to read the attunement paragraph for the first attunement, "cleaning field". For the other twelve attunements in the system all you have to do is ask the dental angels and your higher self for the attunement. Each attunement takes about twenty minutes. You can do them all, one after the other, in one sitting or you can do them one at a time dispersed throughout the day or over many days. You may get overloaded if you do too many of them in a row. Be alert to your feelings and take it as slow or as you feel is right. I recommend doing no more than 3 to 6 a day. You do not need to be in a meditative state to ask for the attunements. You can ask for them any time during any day. However they should be approached with reverence. So even if you ask for an attunement while driving your car or at work please ask with respect and gratitude.

The Attunement

"God, higher self, and all beings that have my highest good in mind and heart and that work with me for health and healing please see that these attunements are of the highest and purest quality and that they are as affective as humanly and divinely possible. Please send any angels, gods, masters, energies or beings needed to activate and maintain this system. Please have all healing forces, energies, intelligences and beings including but not limited to, the higher self, God, any guides, masters, angels or other being that work with humans for healing, any healing energy and healing energy system(s) (Reiki etc.), all healing symbols, mantras, as well as anything found in nature such as the energy of any herb, crystal, mineral, flower, the five elements, lights, color, sounds and homeopathic remedies, vitamins, enzymes, proteins etc. work through this Dental Shakti. Please make sure that all beings, energies and thought and emotional forms of a lower nature that might cause any harm are kept out of this system. Thank You"

The best way to pass this attunement on to other is by having the person read this script. However anyone who is attuned to it can pass it on to others by simply by sincere intention. Passing it on by intension is equal in every way except for the information one gets from reading the script.

Love and Light,
Richard Eisenberg
