

## WHALE SPIRAL SONG REIKI

It is known that whales can communicate over hundreds of miles to find companions. They sing. They dive down to the denser layers of the ocean where the sound waves are trapped and swept long distances, and they sing.

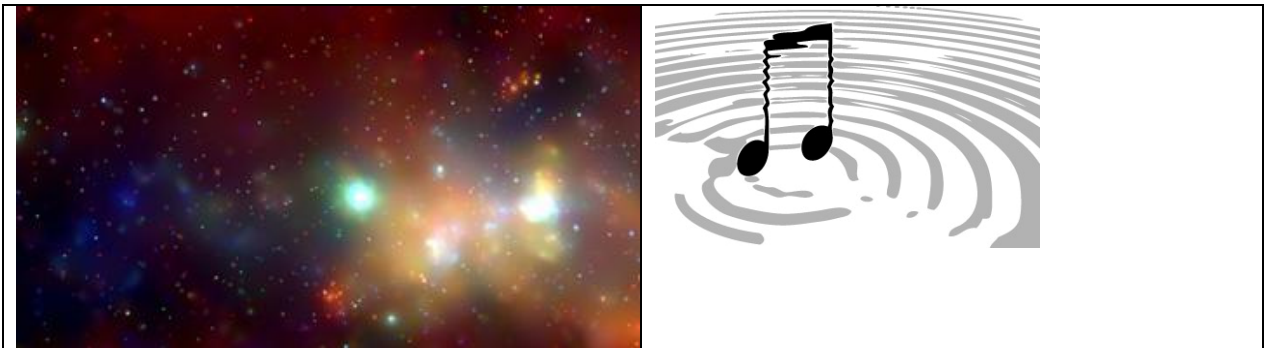

This reiki taps into that strange phenomenon with the idea that whales are not the only creatures that can do this. We don't know what Beings exist in the voids of Space. If they do, and if they seek love, they also must communicate. Calling their energy whale song will do.

To attune to this energy just contemplate the following images in turn. Read the text if you wish. Let the energy call you. Call to your spirit. Good luck!

The Pleiades or Seven Sisters are a beacon in this galaxy and some mystics say they will signal the coming Photon Belt. The sun will rise from the dragon's mouth position of the Milky Way in 2012 in December.

X-rays show the communications that may guide Beings in the void between the stars. Think of how their energy, their songs would feel. What beauty and lonely yearning. What optimism and determination. What compassion.

Open your heart to the center of this spiral of stars and worlds and living beings.

And ground the spiral in your reiki.

Let the whales teach you how to hear their songs. They sing of the spiral of life and love. The hope that burns between the stars. The courage to go on.

Accept their energy and fold it into your own reiki in a way that works for you.

Say “I accept the attunement to the Whale Spiral Song” with the energy of love, and hope and wholeness and all good things.”

Craig Farquharson December 2008
